14:00-18:00
Meeting Room 7

Youth Workshop Programme

Chair: Olav Hesseldahl

Buildung facilitates a workshop with students from Copenhagen International School and Faxehus Efterskole (Boarding School) which will present perspectives to climate change adaptations as seen from the youth. The workshop will raise new undogmatic questions to the issue, and develop creative, young and fresh ideas and solutions to the climate change adaptation. The best ideas will be presented at the closing session, where some of the students also will participate in the final panel debate.

Buildung arranges workshops and seminar for the youth about societal issues, and uses empowerment and co-creation methods to engage the youth in society.
